

Back to basics

With quality you can both see and feel and the affordability you desire, Qbasic clutch type manual shades are anything but your standard shades. You can get the styles you want that coordinate flawlessly with QMotion automated fabrics and fascias, the design features that provide child safety in an elegant device, and the advanced engineering that delivers a smooth and easy lift with less pull force than other clutch-type manual shades.

- Pull force reduction gears reduce the difficulty of raising or lowering the shade.
- Smooth and quiet chain lift system.
- Two sizes for a range of lift capabilities.
- Minimum width of 7".
- Available as large as 120" x 144".
- Equal small light gaps on each side of the shade.
- Nickel plated chain with stainless steel upgrade available.
- Choose from either no fascia or snap-on in the same colors as QMotion automated shades.

Qbasic manual shades let you save where you want to without settling for less. Because sometimes getting back to basics is simply the best choice.

Reduction gear smooths and lightens lifting.
