Advanced Technology

- Patented all-in-one design.
- No unsightly wires.
- Easy to program and easy to install.
- Patented manual override system.
- Patented counterbalance system.
- Industry-leading half-inch light gaps.
- Many control options: phone, tablet, remote, and manual.
- “Whisper” quiet motors.

Solutions to Fit Your Needs

- Multiple shading systems that meet varying installation requirements.
- Narrowest, widest and tallest battery-operated shades: From 15.5" wide all the way up to 156" x 180" with select fabrics.
- Qlink coupled shades can be up to 24' wide x 12' tall, with up to 7 panels.
- Qadvanced systems can be fully integrated with home automation systems including Vantage, Control4, Elan, Savant, RTI, URC and Crestron.

Qbasic+ Manual and Motorized Options in One

- First of its kind Qbasic+ can be installed as manual and later upgraded to motorized without replacing the shade.
- Designed for one-time bracket installation, with chain clutch easily swapping out for motor upgrade.
- Features long-lasting battery or wired system requiring minimal installation work—with no external battery pack or wires.

Luxurious Features & Decorative Fabrics

- Large fabric collection of light-filtering, decorative, and room-darkening materials.
- Choice of dual shade system combines decorative and room-darkening fabric for the best of both worlds.
- Choice of modern, open roll design aesthetic or elegantly concealed fascia option (available painted or with wrapped matching fabric).

Safe by Design

- QMotion is an industry leader in safety standards, with all of Qadvanced motorized roller shades and Qfree manual shades cord-free and “Safe by Design”.
- WCMA Best for Kids Certified.

Qadvanced Shades with ZigBee HA v1.2

- Only shades on the market with ZigBee HA1.2 capabilities built into the motor—no external dongle needed.
- Battery Powered.
- Robust, 2-way ZigBee communication.
- Positioning feedback and battery level alerts with automation apps.
- Uses same installation aesthetic as our QIS wired system, for matching brackets and fascia.
- Ideal for retrofit installations.
- Operates remotely using QzHub3 paired with QMotion QzHub app on your smart device.
- Offers multiple control options: ZigBee HA1.2, third party integration with other control platforms, wireless QdR2 remotes, app control, and patented manual override.

Qadvanced Intelligent System Hardwired Shades

- Designed for wired jobs where energy consumption is a concern.
- Uses standard CAT-5e or CAT-6 cables for both power and communication.
- Industry-leading minimized power consumption.
- Supports up to 200 devices.
- Features wiring adapter for non-QMotion pre-wired installs.
- Offers multiple control options: ZigBee HA1.2, third party integration with other control platforms, hardwired wall switches, wireless QdR2 remotes, app control, and patented manual override.
- Compatible with pro-level integration systems, with bi-directional communication to report shade positions.

Qadvanced Battery-Operated Shades with GEN 3

- Features 3rd-generation QMotion proprietary protocol.
- Great for stand-alone applications.
- Equipped with Gen 3 Qsync for smart-home integration.
- QMotion Qsync App is available for iOS or Android smart device.
